Virtual data rooms for GDPR-compliant teamwork

- Digital committee rooms for efficient management of boards and committees
- Perfect for M&A processes from preparation, transaction and integration
- Secure board communication for document exchange
- Fast information provision for optimised asset management transactions
- Quick and easy handling of comprehensive review processes such as due diligence

Tools for efficient and protected collaboration

- Messenger and chat
- Secure mobile access via browser and app
- Tools for scheduling and voting

Seamless integration into existing infrastructures

- Integrate e.g. with MS Teams and APIs
- Simple synchronisation on end devices
- Individualisation according to the CI

Extensive support services

Who is idgard suitable for?

The entire idgard platform is compliant with GDPR. All data room activities are documented in a revision-proof manner. idgard can be used for exchange and storage of sensitive data e.g. in following processes:

- Board communication
- M&A transactions
- Due diligence
- Asset management
- Professional confidentiality
- Board communication

Protect the future of your business with secure cloud collaboration.

Cloud collaboration is the future of work. With idgard and the Sealed Cloud technology, companies are finally able to work with private data in the cloud.

Choose sealed, because encrypted is not secure enough.

idgard and its patented Sealed Cloud technology (EP 238964) are TCDP III certified, the highest protection class for cloud services. All data is protected during storage, processing and transferring. Even idgard employees of idgard are technically excluded from viewing your data.

Put your data where it belongs: in safety.

All servers are operated exclusively in Germany. This means your data always remains under German data protection law. The entire platform complies with GDPR and can therefore be used where professional secrets must be protected (in accordance with §203 StGB).

Best-protected teamwork. Quick and easy setup.

idgard is intuitive and easy to use. Without any prior knowledge, idgard can be set up with any browser in just a few clicks. Within minutes, you can start cloud collaboration with your team and external partners.

We create
trust through
security.
